COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Eric Mcrobie

Date: 09/14/2014 06:08:52

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Eric Mcrobie

419 Marshalls Creek Rd

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

From: Mary Leahy  
Date: 09/14/2014 06:08:52  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Mary Leahy

NAME: Vanessa Chu  
ADDRESS: Caverly Crt.  
POST CODE: L5L 3L7  
COUNTRY: CA  
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Kathi Robinson  
Date: 09/14/2014 06:08:53  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Kathi Robinson  
1070 Willamina Ave  
Forest Grove, Oregon 97116

NAME: Michael Moriarty

ADDRESS: The UK

POST CODE: 0000

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband

access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: Sharon godwin  
Date: 09/14/2014 06:08:53  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Sharon godwin  
2500 E Mary Lue St Lot B  
Inverness, Florida 34453

From: Gerda Seaman  
Date: 09/14/2014 06:08:54  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Please please allow us net neutrality. Somehow the whole of US life is now based on extracting money from its citizens. WE need clear and neutral news, not gatekeepers who can distort our understanding. Democracy cannot exist where the public does not have neutral sources of information. Too many of our media are owned by those who sell advertising space which makes their news dependent on their sponsors.

Gerda Seaman

These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

This is a Proceeding 14-28 comment submitted through battleforthenet.com.

---

NAME: Maria Junowicz

ADDRESS: asdasd

POST CODE: 1405

COUNTRY: AR

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless

of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle

free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

=====  
From: Michelle Motyka  
Date: 09/14/2014 06:08:55  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Michelle Motyka  
103 Pinecrest  
Seagoville, Texas 75159

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the

highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal

would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: Roxanne Espinoza  
Date: 09/14/2014 06:08:57  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Roxanne Espinoza  
8300 Broadway Dr  
El Paso, Texas 79915

NAME: Terence Chuang

ADDRESS: 1701 Alberni Street

POST CODE: V6E4R9

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

ADDRESS: Newfoundland, Canada

POST CODE: A0G 1B0

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

This is a Proceeding 14-28 comment submitted through battleforthenet.com.

---  
NAME: Michael Lee  
ADDRESS: 3868 Glenalbyn Dr Los Angeles CA  
POST CODE: 90065  
COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our

communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: nathan dundee

Date: 09/14/2014 06:08:58

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad

phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

nathan dundee  
4316 Wittman Dr  
Davenport, Iowa 52806

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Sam Chadwick

ADDRESS: Australia

POST CODE: 3214

COUNTRY: AU

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

POST CODE: b3z2g2

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold

and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning,

would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Heath Cairns  
ADDRESS: 5208-01 St. Laurent  
POST CODE: H2T 1S1  
COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the

so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Norman Gibson  
Date: 09/14/2014 06:09:02  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's 2014 crippling

new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Norman Gibson  
4 Lindberg Ave  
Greenville, South Carolina 29601

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Anne Pilaro  
Date: 09/14/2014 06:09:03  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Anne Pilaro  
14661 Woonsockett Dr  
Silver Spring, Maryland 20905

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

tereele Rogers

9905 Parkview Ave

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling

todayâ\200\231s bipartisan â\200\234Hands off the Netâ\200\235 approach. You canâ\200\231t have â\200\234just enough Title IIâ\200\235 any more than you can be â\200\234slightly pregnant.â\200\235

Title II would hurt startups most: they canâ\200\231t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCCâ\200\231s powers over the Internet. Remember, you wonâ\200\231t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you donâ\200\231t intend.

Yet, as youâ\200\231ve noted, Title II wouldnâ\200\231t even allow the FCC to do what its proponents demand: ban â\200\234fast lanes.â\200\235

We urge you to carefully focus regulation on real problems, what Chairman Kennard called â\200\234vigilant restraint.â\200\235 But remember Kennardâ\200\231s digital mantra, too: â\200\234First, do no harm.â\200\235 If you conclude that existing laws arenâ\200\231t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCCâ\200\231s authority. No government agency should be trusted with a blank check to regulate the Internet at whim â\200\224 whether thatâ\200\231s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: Julie Sexton  
Date: 09/14/2014 06:09:04  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Julie Sexton

ADDRESS: senador morais filho

POST CODE: 74515010

COUNTRY: BR

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the

highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal

would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: Wa Baez  
Date: 09/14/2014 06:09:05  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of

internet freedom here in America.

Sincerely,

Wa Baez  
8 Llandillo Rd  
Havertown, Pennsylvania 19083

From: Arnold Hickman  
Date: 09/14/2014 06:09:06  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Arnold Hickman

COUNTRY: KR

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking,

a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: lori mcardle  
 Date: 09/14/2014 06:09:07  
 Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

lori mcardle  
 5755 Carol Plantation Rd  
 Theodore, Alabama 36582

=====  
From: Alan Walter  
Date: 09/14/2014 06:09:08  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Alan Walter  
442 NW 7th St  
Buffalo Lake, Minnesota 55314

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

ADDRESS: 2075 E 20th avenue

POST CODE: v5n 2l1

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless

of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal

would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking,

a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

ADDRESS: 516 Hallmark Dr.  
POST CODE: N2K3P5  
COUNTRY: CA  
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: DeeDee Doney  
Date: 09/14/2014 06:09:11  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

DeeDee Doney

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on

Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Nickole Hosang

NAME: Scott Johnson

ADDRESS: 01/92 Clovelly Road

POST CODE: 2012

COUNTRY: NZ

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

POST CODE: L6C 2S1

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access

to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules

that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Save the Open Internet! (GN Docket No. 14-28)

Sep 14, 2014

FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can't afford it will be relegated to second-tier, slow lane service. That action will harm the Internet's roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

James Bochenek

DELMAR, NY

From: Sherri Moore

Date: 09/14/2014 06:09:13

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Sherri Moore

14652 Bakersfield St

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold

and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning,

would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Carolyn Myres  
Date: 09/14/2014 06:09:17  
Subject: Save the Open Internet! (GN Docket No. 14-28)

Sep 14, 2014

FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can't afford it will be relegated to second-tier, slow lane service. That action will harm the Internet's roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

Carolyn Myres

Cleburne, TX

From: Gary Turley

Date: 09/14/2014 06:09:17

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know

that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Gary Turley  
200 Alpine St

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Glenda Londrow

COUNTRY: BR

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: BRUNILDA PADILLA  
Date: 09/14/2014 06:09:18  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth.

Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

BRUNILDA PADILLA  
97 Waterville St  
Waterbury, Connecticut 06710

NAME: Rosana Martinez

ADDRESS: La Prairie, Quebec, Canada

POST CODE: j5r 4g4

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Trish Arnett  
Date: 09/14/2014 06:09:18  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said:  
"What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Trish Arnett

From: Josh Hamm  
 Date: 09/14/2014 06:09:19  
 Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Josh Hamm

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the

highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: Nancy Gutierrez  
Date: 09/14/2014 06:09:20  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's 2013 crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Nancy Gutierrez  
7123 Holly St Apt E  
Oakland, California 94621

POST CODE: 4511

COUNTRY: PH

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: Jill Stewart  
Date: 09/14/2014 06:09:21  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Jill Stewart  
4631 E Cochise Dr  
Phoenix, Arizona 85028

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider

what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

sheri parks

POST CODE: SN8 2DE

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses

and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

carl Sanderson

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our

communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Robert Edwards

ADDRESS: 59 William Road, Sutton.

POST CODE: SM1 4QT

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking,

a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. From: Neola Wright  
Date: 09/14/2014 06:09:23  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Neola Wright  
1336 NW 16th Ave  
Amarillo, Texas 79107

NAME: Nick Moore

ADDRESS: 927 Malvern Terrace

POST CODE: k7p2y6

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

susie brent  
507 Downing St  
Denver, Colorado 80218

From: Helen Poole  
 Date: 09/14/2014 06:09:24  
 Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said:  
 "What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Helen Poole  
 2 Island Rd  
 Norton, Massachusetts 02766

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Leonard Osborn

Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Ryan

ADDRESS: 11 chapman ave

POST CODE: m4b1c3

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the

so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Ashley Stiefer  
Date: 09/14/2014 06:09:25  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Ashley Stiefer

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or

false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Dion Parris

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new

regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

NAME: Amanda M Henderson

ADDRESS: 02 Greenough Ave Apt 04

POST CODE: 02130

COUNTRY: KR

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Ben Cooper

ADDRESS: Unit 04, 06 Fraser Street Hobart, Tasmania Australia

POST CODE: 7008

COUNTRY: AU

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for

the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: FRANCINE LAKE

Date: 09/14/2014 06:09:28

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rule making, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present form.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

FRANCINE LAKE  
6001 Millfair Rd

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Dehne ambatchew

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

drew stewart

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Fernando Garcia

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

shaun woodfield

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless

of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
James Good

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Gil Gordon

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

andre mitchell

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Tj Johns  
Po Box 1625  
Fulton, KY 42041

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others

are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Dan Forlasto

NAME: Edwin Janisse  
ADDRESS: 205 Victoria St Kitchener  
POST CODE: N2M 1K4  
COUNTRY: CA  
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses

and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Fran York

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Aschia Daswani

NAME: Bartlomiej Bohuzynski

ADDRESS: 4825 Borden Apt#17

POST CODE: H4V2S9

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:09:33  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Michael Delaney

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

 Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
 Ray West  
 17043 Gresham St  
 Northridge, CA 91325

 Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new

regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless

of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Date: 09/14/2014 06:09:34  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on

the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Hussain Younes

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Barbara Reed

ADDRESS: 1200 S Tennyson Dr

POST CODE: 88030

COUNTRY: KE

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: chris clark  
Date: 09/14/2014 06:09:35  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

chris clark  
802 W 2nd Ave  
Gastonia, North Carolina 28052

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Date: 09/14/2014 06:09:35  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administration and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Melinda Kelly

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

From: Lisa Culver  
Date: 09/14/2014 06:09:36  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said:  
"What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Lisa Culver  
6025 Horse Trap Dr  
Fort Worth, Texas 76179

ADDRESS: 05 Wolfreton Drive Anlaby Hull UK

POST CODE: HU10 7BY

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle

free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Daniel Ophardt

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the

other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Jerry Hardin

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the

FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

NAME: Justin Scott McAndrew

ADDRESS: 29 Adelaide Street

POST CODE: L0E1N0

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:09:38  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Ned Pollack

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

John Macky

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear ã\202-ã\200\234 investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Marsha Moore

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby

ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:09:39  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Andrew Caygill  
2805 5th St Sw Apt 03  
Minot, ND 58701

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Teresa Olmstead

NAME: Daimon Pitiroi

ADDRESS: 11 Stattion Road Papatoetoe Auckland

POST CODE: 2025

COUNTRY: NZ

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the

highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:09:40  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Frank Amezcua  
18509 Bellorita St  
Rowland Hghts, CA 91748

NAME: Christopher McGuicken

ADDRESS: 67 Boucher Crescent

POST CODE: BT12 6HU

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxxx@xxxxx.xxx  
Date: 09/14/2014 06:09:41  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Pamela Ajayi

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by

bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Daisey Mattison  
Date: 09/14/2014 06:09:42  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Daisey Mattison  
2900 Camp Creek Pkwy Apt M4

From: Juan Rivera  
 Date: 09/14/2014 06:09:42  
 Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Juan Rivera

 Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said: "What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
David Lidgard

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by

regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Gabriel Sanchez

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Barbara Colin  
18366 Munn Rd  
Chagrin Falls, OH 44023

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Obie Blackmon

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

wendy ballance  
148 Mill St  
Mount Holly, New Jersey 08060

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Doug Dillner

From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:09:44  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes

through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn't take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn't matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Randy Pointer  
23315 Triple Spur Ln  
Spring, TX 77373

From: Rickey Frost  
Date: 09/14/2014 06:09:44  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Rickey Frost  
4007 E 176th St  
Cleveland, Ohio 44128

NAME: Thomas Bellink

ADDRESS: 19 Townley Rd KooWeeRup Australia

POST CODE: 3984

COUNTRY: AU

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Violet Okwuosah

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job of providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides.

Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Janet Williams  
5217 33rd St  
Groves, TX 77619

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Alex  
ADDRESS: 06 Stradishall Way  
POST CODE: 3043  
COUNTRY: AU  
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Cheryl Pennyman

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

From: Terri Grafton  
Date: 09/14/2014 06:09:47  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Terri Grafton

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: David Nielsen

Date: 09/14/2014 06:09:48

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said: "What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

David Nielsen
